I need to visit this client, let's go to TM App and request a trip there!

Looks like someone just asked for a trip!
Let's use the app to search for the best options and create some proposals!

Done and sent 😊

All approved here?
Great! Now I'll have to go make the reservations on their sites.

I wish the TM App would also allow to make the reservations...

Well, maybe in the future... 😊

Fine by me!
